AJAEGBU SHEDRACK

FRONT-END DEVELOPER

Actively searching

Ogudu, Anambra , Nigeria | Male

BSc. Physics | Enugu State University of Science and Technology, Enugu | 2nd Class Lower | 2017

Summary

A Front-End Web Developer with professional experience developing responsive, scalable, test-driven, modern websites/applications as well as a strong experience working on the backend with NodeJS, Express, and MongoDB. Able to maintain focus even when under pressure and yet balance multiple competing priorities, having worked as a Front-End Developer whilst still achieving strict deadlines for submission of projects. Gives attention even to small details, which was as a result of working closely with UI/UX Engineers. Aiming to secure a challenging role as a Front-End [or a Backend] Developer in a company where I can utilize my skills and be accountable for my work.

Skills

Good team player and exceptional team spirit hence putting team's objective before mine. **(advanced)** ,

Excellent research skill, good inter-personal human skills **(intermediate)** ,   TypeScript **(intermediate)** ,

NodeJS and Express **(advanced)** ,   Bootstrap **(intermediate)** ,   React **(intermediate)** ,

ES6+ **(intermediate)** ,   JavaScript **(advanced)** ,   Git and Github **(intermediate)** ,

HTML & CSS **(advanced)** .

Experience & Projects

Exercizm (http://https://exercizm.herokuapp.com)

This app was built to keep track of assignments/exercises given to the users/team. Well, the aim was but to demonstrate how the CRUD operations work in MERN stack. Technologies: MongoDB, Express, React, Nodejs, BootStrap 4 [for the styling]

Arcade Game (http://https://theshedman.github.io /arcadeGame)

This is an arcade game where the player has to avoid contacts with the bugs which are his enemy. The player would be killed when he has a contact those bugs. The game has levels up to 10. It is a very fun game to play. Technologies: JavaScript, HTML5, CSS3

Card Game (http://https://theshedman.github.io/card-game/)

A web-based, concentration game that was built for fun. The game has some features like timer: which keeps tracks of how long it takes the player to complete the game, Reset button for resetting the game at any point, the number of moves the player makes, and a row of stars for representing the player's life. Technologies: JavaScript, HTML5, CSS3 [with css grid and flexbox for the layout].

Fake Profile (http://https://theshedman.github.io /shedrackAjaegbu)

This project was built only to point out the power of CSS3 Flexbox for page layout. Technologies: HTML5 and CSS3

Book Review App (http://https://theshedman.github.io /bluebic_book-app/books.html)

A mobile app for reviewing books. The purpose of the project is to stretch on the importance of good designs. All the links in the app are working well. Technologies: HTML5 and CSS3.

Weather Application (http://https://theshedman-weather-application.herokuapp.com)

This a small project for checking the state of the weather, like temperature and possibility of rainfall, in any given location. Technologies: Nodejs, Express, ES6, CSS3, Handlebars.js

BlueBic (http://https://www.bluebic.com)

Apr 2019 - present

Front-End Developer

My role was to build reusable code and components for future use, and as well write front-end components that consume the RESTful APIs from the backend. I fixed design issues and tested them for multi-device and cross-browser compatibility. Technologies: ES6, React, Nodejs

DevAmplified, Awka (http://https://www.devamplify.com)

Sep 2017 - Feb 2019

Front-End Developer

I worked with UI/UX designers to translate UI/UX designs to code by bridging the gap between graphical design and technical implementation and also help the backend developers to ensure that the interaction between the backend and front-end is smooth. Technologies: JavaScript (ES6+), Boostrap, NodeJS, HTML5 & CSS3
